

# AirCare+

MVHR & MEV Servicing and **anti-bacterial duct cleaning**

AirCare+ helps remove built up dust, debris and grease inside your MVHR or MEV system and ducting. This extensive deep clean service offers 3 key benefits:

- 1** A system running at optimal efficiency and performance
- 2** Sanitised, hygienic ductwork
- 3** Improved indoor air quality levels

Before

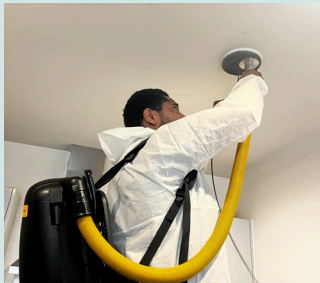

After

## What builds up inside your ductwork?

We can't see air, but it's full of particles that impact indoor comfort - your system runs 24/7 and quickly clogs with;

- Dust and debris
- Pet dander
- Moisture and mould spores
- Bacteria
- Pollen
- Airborne contaminants

## AirCare+ What's included?

### CLEAN

**Mechanical brushing and extraction**

A specialist rotating brush + high-powered extraction removes the hidden dust and debris lining the ducts.

### SANITISE

**NHS grade anti-bacterial duct misting**

A safe anti-bacterial mist is applied to all ducting routes, neutralising bacteria spores and allergens following debris removal.

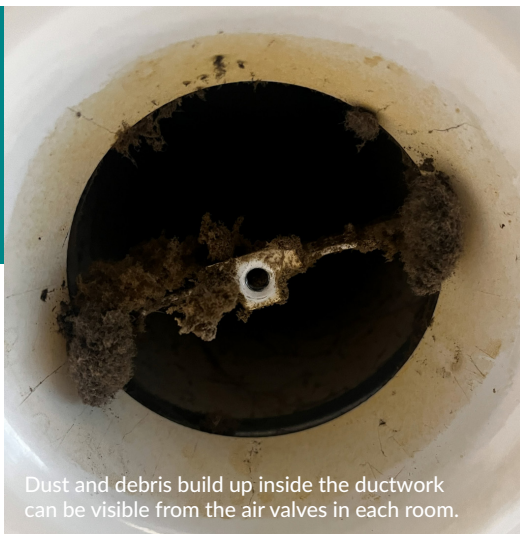

### SERVICE

**Full MVHR/MEV unit service**

We replace the filters, clean all internal and external parts of the system and test to ensure efficient operation.

## Before & After Swab Testing

To give full transparency we take surface swabs before we clean. Swabs are taken after sanitisation and results are provided so you can see the measurable improvement.

Dust and debris build up inside the ductwork can be visible from the air valves in each room.

Duct cleaning is recommended every 5 years - that is a total of

# 43,800 hours

of air movement in and out of the home, and often results in a considerable build up that impacts system performance and air quality!

## MVHR & MEV Servicing & Maintenance

Do not turn your ventilation system off. Your home requires effective air movement to maintain comfort and good indoor air quality.

### MVHR Maintenance

- System servicing is recommended annually
- Filter check/replacement is recommended every 6 months (or sooner depending on the location of your property)

- If you don't believe the unit is working effectively, or there are error codes showing on the unit a service or investigation may be required
- Deep duct clean recommended every 5 years

### MEV Maintenance

- System servicing is recommended annually
- Deep duct clean recommended every 5 years

If you'd like to discuss servicing or maintenance, call us on 033 0223 4180
